Category:

Supplement

Indications:

This product is used to support skin health.

Functional Properties:

Collagen

Is responsible for skin strength and elasticity and its degradation leads to wrinkles that accompany aging.

It strengthens blood vessels and plays a role in tissue development and as a supplement to aid joint mobility. Collagen is a natural product and the main component of skin cells that helps in all stages of wound recovery because of its natural ability to fight infections.

Collagen type 1 and 3

In the skin, collagen type 1 is responsible for the firmness and elasticity of the skin. This helps prevent aging and wrinkling of the skin that occurs with age and the natural production of collagen decreases.

Type 3 collagen, also known as reticular collagen, is found in skin, muscles, and blood vessels

Vitamin C

Also known as ascorbic acid, has several important functions. These include: helping to protect cells and keeping them healthy, maintaining healthy skin, blood vessels, bones and cartilage.
